Trofeo Organica/Organic 00

Si distinguono per l'utilizzo dei materiali "organici" tradizionalmente usati dalle case motociclistiche. Le pastiglie freno assicurano il medesimo standard produttivo del primo equipaggiamento, quindi un ottimo grado di sicurezza e un vantaggioso rapporto qualità/prezzo.

They are characterized by the use of materials "organic" traditionally used by motorcycle manufacturers. The organic brake pads provide the same standard of the first production equipment, and a high degree of safety and a favorable quality / price ratio.

Trofeo Sinterizzata/ Sintered 01

Le recenti tecnologie hanno consentito di sviluppare materiali d'attrito innovativi, partendo da composti quali rame, bronzo, ferro, ceramica e grafite. Ognuno di questi elementi svolge una funzione specifica durante la frenata migliorandone la potenza e l'efficacia anche nelle condizioni estreme di bagnato e sporco. Inoltre riducono il surriscaldamento e assicurano una frenata modulabile con confort d'utilizzo anche alle basse temperature d'esercizio.

Recent technologies have allowed us to develop innovative friction materials, starting from compounds such as copper, bronze, iron, ceramic and graphite. Each of these elements performs a specific function during braking improving the power and efficiency also in extreme conditions of wet and dirty. They also reduce overheating and ensure braking with modular comfort of use, also at low temperatures.

Trofeo Ceramica/ Ceramic 221

Nata dalla collaborazione con i maggiori team Sbk in ambito internazionale, la linea delle pastiglie ceramiche 221 sono indicate per un uso agonistico, non omologate per circolare su strada. Le caratteristiche principali che abbiamo voluto ricercare per questo prodotto sono nella potenza e nella modulabilità. Altro particolare non di poco conto è la bassa temperatura di esercizio, riscontriamo mediamente un 10% in meno rispetto alla pastiglie della concorrenza, il tutto si tramuta in un minor consumo, minor temperatura d'esercizio dell'impianto frenante onde evitare la fastidiosa spugnosità della leva freno.

Born from the collaboration with leading Superbike team in the field International, the line of the ceramic pads 221 are indicated for a competition use, not approved for use on the road. Features major that we wanted to look for this product in the power and scalability. Another detail not to be underestimated is the low operating temperature, on average we find a 10% in less than the tablets of competition, everything turns into a lower consumption, lower operating temperature of the brake system to avoid the annoying spongy brake lever.
